MAY 4 2006

CR

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office.

We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statement of Water Division and Use must be filed by January 1st of each year. Since 1914, new appropriators have been required to obtain a permit and license from the State to determine if additional water is available for future appropriations. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation, and (3) assists the State to determine if additional water is available for future appropriations.

An appropriate right is required for use of water on non-irrigable land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by irrigators. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Appropriate rights can be granted to waters "foreign" to the natural stream system.

A irrigator's right enables an owner of land bordering a natural lake or stream to take and use water on his irrigable land. Irrigating land must be in the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel. Irrigation rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return to the stream, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are irrigational and appropriative rights.

"The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov/>"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Application of Water in California.

Statements of Water Diversion and Use must be filed by preparan and pre 1914 appropratitive water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriaion upstream from their diversions, and (3) assists the State to determine if additional water is available for future purposes.

An appropriate right is required for use of water on nonirrigated land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by irrigation users. Since 1941, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his land. Riparian land must be in the same watershed as the water source and must never be used to deprive others of the sources of supply by intervening parcels without reservation of the riparian right to the water. Generally, a riparian user must share the water supply with other riparian users. A riparian right to the water may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land without regard to the same water shed as the water source and must never have been served from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statement of Water Diversions and Use must be filed by a preparer and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different water shed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Since 1914 new appropriators have been required to obtain a permit and license from the State.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
